

# BDC OTA Update User Manual

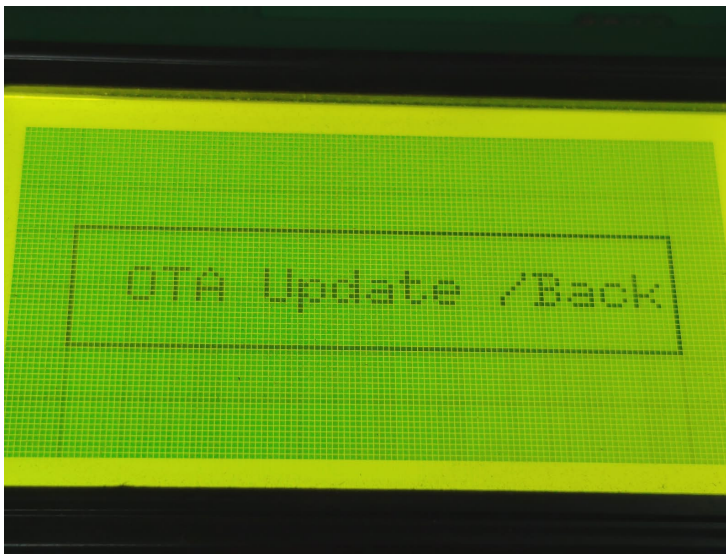

## What is OTA Update?

OTA (Over-The-Air) Update allows the device software to update automatically using WiFi. This helps improve performance, add new features, and fix issues without needing a cable or technician visit.

---

## How OTA Update Works

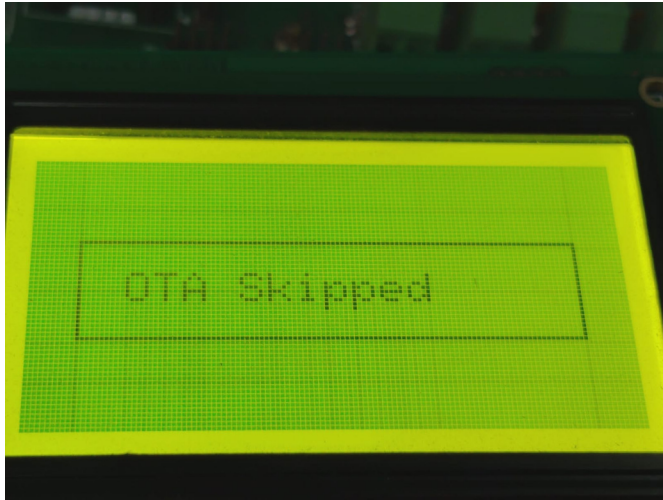

- The device checks for new software updates automatically.
- If a new update is available, an update message appears on the screen.
- The device waits for a few seconds before starting the update.
- If no action is taken, the update starts automatically.

# Skip Update Option

When the update popup appears:

OTA Update  
Press Back to Skip

You can:

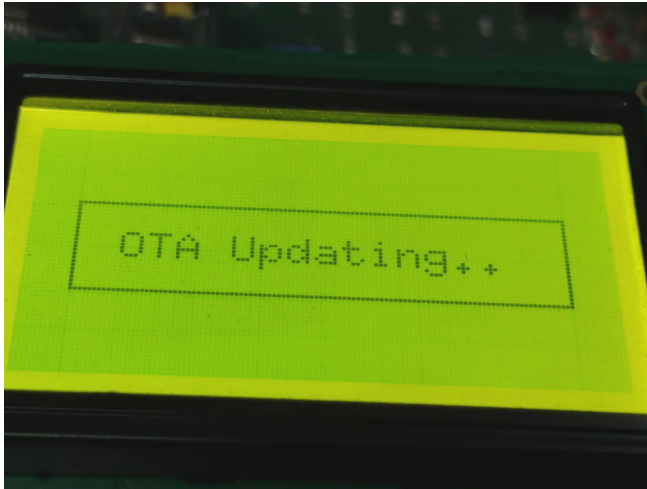

- Press **Back** within 8 seconds to skip the update.
- Do nothing to continue the update automatically.

---

## During the Update

While updating:

- Device operations may pause temporarily.
- Do not turn off the power.
- Do not disconnect WiFi.
- The screen may display update progress.

The device will restart automatically after the update is completed.

---

## Important Instructions

### Keep Power ON

Do not switch off the device during update.

### Keep WiFi Connected

Ensure the device remains connected to WiFi.

### Wait for Restart

After update completion, the device restarts automatically.

---

## If You Skip the Update

If you press **Back**:

- The update is cancelled temporarily.
- Device continues normal operation.
- The system will check again later for updates.

---

## Benefits of OTA Updates

- No need for USB cable
  - Automatic software improvements
  - Faster bug fixes
  - Remote maintenance support
  - Improved device reliability
- 

## Troubleshooting

### Update Not Starting

Check:

- WiFi connection
- Internet availability

### Device Restarted During Update

Wait for the device to reboot completely.

### Update Failed

The device automatically returns to normal operation and will try again later.

---

## Safety Notes

- Never remove power during update.
  - Avoid unstable WiFi connections.
  - Perform updates when device usage is minimal.
-

# Summary

The OTA Update system keeps your device up to date automatically and safely. You can skip updates temporarily using the **Back** button whenever needed.
